

Dynacorp® D2100 Control Part# 214215 (115 VAC Input) Installation

Description:

The Dynatec 2100 (D2100) is a plug-in clutch-brake power supply designed to mount into an eight pin octo-socket. The D2100 is engineered to operate a 90 VDC clutch and/or brake coil with current loads up to 2.0 amps. The compact plug-in design allows for ease of installation and replacement. The D2100 is fused on both input power lines to protect the controller system. This control incorporates voltage protection on the AC input to suppress transient spikes, present on some power lines.

Specifications:

Model D2100

Part # □ 214215
Input V 115 VAC 50/60 Hz
Output V 90 VDC
Output A 2.0 Maximum
Fuse (2) 3A, 250 VAC Micro-Fuse

Notice: Use wire and methods in accordance with Local, State, and National Electric Codes (NEC).
